

Facet Engineering was established in 1989, and specialises in the design, manufacture and supply of conveyors and agri-food process plants and equipment.

From humble beginnings, as a design office, 29 years later the company now boasts a fully equipped 2000m² workshop facility. With offices in both Johannesburg and Cape Town, this enables us to service the entire South African market, as well as neighboring states and numerous African countries.

With one of the finest design teams in the industry and utilising the latest computer-aided design tools and facilities, we offer cost-effective workable solutions.

Our experience in material handling, conveying technology and agri-food processing is unsurpassed, with collectively, over 50 years of hands-on experience. Our range of conveyors and agri-food process systems, that we design and manufacture is extensive and can best be viewed on our website, www.facetengineering.co.za.

We offer purpose-made machinery, including all necessary ancillary equipment, such as storage bins, support platforms and connecting chutes right through to turnkey projects.

Our services also include the delivery, installation and commissioning of all of our equipment. Our global footprint is further enhanced with our association with Zaccaria, a leader in the supply of cereal processing systems and machinery.

We welcome the opportunity to be of service to you. For further information on any of our products and services or to discuss your specific requirements, please contact us using the details below.

SOLUTIONS FOR:

* STORAGE * CONVEYING * CLEANING * SEPARATING
* GRADING * MIXING * SORTING * BAGGING
OF GRAIN, SEED & CEREAL PRODUCTS

Part of our range includes:

- Belt conveyors
- Drag chain conveyors
- Bucket elevators
- Screw conveyors
- Swing tray bucket elevators
- Mobile bag stacking conveyors
- Pneumatic conveying
- Grain cleaners & pre-cleaners
- Destoners
- Maize degerminators
- Gravity tables
- Length graders
- Electronic colour sorters
- Ribbon blenders
- Storage silos & bins
- Dust extraction systems
- Bulk bag handling systems
- Seed processing plants
- Rice processing plants & equipment
- Animal feed plants
- All ancillary equipment such as storage bins, support platforms and connecting chutes.
